Cloud DevOps Engineer with 4+ years of experience delivering enterprise-grade AWS infrastructure, CI/CD automation, and multi-cloud solutions across Singapore, Australia, and Indonesia. Holds 6 AWS certifications alongside 2 Google Cloud certifications. Proven track record managing mission-critical systems with 99.99% availability and achieving full PCI DSS compliance for regulated clients.

Work Experience

Deeeplabs Pte Ltd — **Singapore** (Remote)
Cloud Engineer — *June 2025 – Present*

- Architected an AWS-based cloud self-service portal automating infrastructure provisioning and management in isolated networks for a leading Singapore public university.
- Modernized 50+ .NET and Java applications by migrating manual deployments to automated SHIP-HATS CI/CD pipelines using GitLab, Trivy, and SonarQube for a major Singapore polytechnic institution.
- Developed a serverless queue management system (AWS Lambda, SQS, API Gateway) handling ~3,000 high queuing transactions for a Singapore government ministry eliminating manual processing bottlenecks.

FlexiDev Pty Ltd — **Australia** (Remote)
DevOps Engineer (AWS and Azure) — *March 2025 – May 2025*

- Engineered a multi-cloud asynchronous backup solution (AWS to DigitalOcean via Rclone) covering 1TB of client data, achieving GDPR compliance for an international Gaming Platform.
- Engineered hybrid CI/CD pipelines with Infrastructure as Code targeting Proxmox and Azure App Service with Blue-Green deployments to ensure zero-downtime releases.

G-Asia Pacific Sdn Bhd — **Indonesia** (Hybrid)
Cloud Technical Engineer (AWS and Google) — *May 2024 – February 2025*

- Served as technical lead between Malaysia HQ and Indonesian enterprise clients, coordinating delivery of cloud infrastructure across 2 concurrent projects.
- Architected the end-to-end deployment process with the performance and security best practice.
- Designed and deployed a secure, multi-account AWS infrastructure compliant with PCI DSS.
- Managed high-availability AWS resources, reducing operational costs by 40% through rightsizing and Reserved Instance optimization.

PT. Central Data Technology — **Indonesia** (Hybrid)
AWS Managed Service — *Aug 2022 – May 2024*

- Managed mission-critical AWS infrastructure for high-profile enterprise clients, ensuring 99.99% availability for SAP, ERP, ArcGIS, and Core Banking systems.
- Designed and deployed scalable AWS architectures including VPC, EC2 Auto Scaling, RDS Multi-AZ, and CloudFront distributions for enterprise workloads.
- Resolved 100+ support cases with a 100% success rate, consistently exceeding SLA targets.

Education

Bachelor of Computer Science — *Sep 2018 – Feb 2022*
Esa Unggul University - Indonesia

- GPA: 3.74 (Top 10% of class)

Professional Certifications

- AWS Security – Specialty
- AWS Solutions Architect - Professional
- AWS DevOps Engineer - Professional
- AWS Solution Architect
- AWS SysOps Administrator
- AWS Cloud Practitioner
- Google Cloud Architect – Professional
- Google Cloud Engineer
- IELTS B2
- German A1 Goethe-Zertifikat

Skills

- Cloud Platform : AWS, GCP, Azure, DigitalOcean, Windows, Linux
- IaC & CI/CD : Terraform, CloudFormation, GitLab CI, GitHub Actions, Azure DevOps, SHIP-HATS
- Containers : Docker, Kubernetes, EKS, ECS, Lambda, Cloud Run
- DevSecOps : Trivy, SonarQube, PCI DSS, GDPR
- Monitoring : Prometheus, Grafana, CloudWatch
- Scripting : Python, Bash, PowerShell, boto3
- Networking : Transit Gateway, VPN, DNS, Firewall, CDN, API Gateway, Nginx

Training

Professional Development

- AWS Re/Start Program (July 2022)
- AWS Partner: Advanced Migrating to AWS - Technical (September 2022)
- Google IT Automation with Python - Coursera / Google (2021)
- Bangkit Academy – Google, Tokopedia, Gojek & Traveloka (2021)
